

Industry Technology & Competitiveness Scan Worksheet

Use Porter's Five Forces to assess how competitive the industry is and how advanced it is in technology and innovation. Focus on the industry level, not an individual organization.

Step 1 — Identify the industry

Industry name: _____

Brief description of the industry:

Step 2 — Current use of technology in the industry

List common technologies, platforms, automation, AI, or digital tools used:

Step 3 — Porter's Five Forces with a technology and innovation lens

1. Threat of new entrants

Explanation:

Score (1–5): ____

2. Bargaining power of suppliers

Explanation:

Score (1–5): ____

3. Bargaining power of buyers

Explanation:

Score (1–5): ____

4. Threat of substitutes

Explanation:

Score (1–5): ____

5. Rivalry among existing competitors

Explanation:

Score (1–5): ____

Step 4 — Calculate overall results

Total score (sum of five scores): _____ / 25

Interpretation:

0–10 = low technology intensity, slow innovation

11–17 = medium technology intensity, developing innovation

18–25 = high technology intensity, highly innovative industry

Step 5 — Short conclusion

How competitive is this industry?

How advanced is this industry in technology and innovation?

Biggest technology opportunities in the industry:

Biggest risks or challenges for companies:
